Pi has about 6.4 billion known digits which would take a person roughly 133 years to recite without stopping. The world record holder for the most memorized digits of Pi took nine hours to recite over 44,000 digits of Pi.

Will anyone break the Fuller record? The record to be broken was set in 2009 at 335 digits. There are only 4 more days until we find out who will be the Pi Champions at Fuller this year. Keep practicing!!!
